

NANDINI RAULJI

Full Stack Developer

+91 9978071673 • nandiniraulji1456@gmail.com • Vadodara, Gujarat • github.com/Nandini14056

PROFESSIONAL SUMMARY

Full-stack developer and B.Tech IT student (2027 batch) who has shipped three end-to-end web applications on the MERN and PHP stacks, including a deployed three-role food delivery platform with real-time GPS tracking and two AI-integrated tools built on the Groq API. Hands-on with REST APIs, JWT authentication, SQL/NoSQL data modeling, and Git-based deployment workflows on Vercel, Render, and MongoDB Atlas. Seeking full-stack developer or entry-level software development roles.

EDUCATION

B.Tech in Information Technology — MBIT, Anand | 2023 – 2027 (2027 Pass-out Batch)

Higher Secondary Certificate (12th) — Jawahar Navodaya Vidyalaya | 2020 – 2022

Secondary School Certificate (10th) — Jawahar Navodaya Vidyalaya | 2020

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, jQuery

Backend: Node.js, Express.js, PHP, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL, SQL, JSON data handling

Tools & Platforms: Git, GitHub, Vercel, Render, NPM, MongoDB Atlas, Postman

EXPERIENCE

PHP Trainee Intern | *Superix Technologies* | May – June 2026

- Built and maintained PHP-based features and modules within an existing production codebase
- Debugged and enhanced existing functionality in collaboration with senior developers
- Worked with MySQL databases to support application data handling and queries

PROJECTS

CampusEats — Campus Food Delivery Web Application | *React.js, Node.js, Express.js, MongoDB, Socket.IO, JavaScript*

- Developed a full-stack, three-role platform (customer, seller, delivery partner) with React.js on the frontend and Node.js/Express.js REST APIs on the backend
- Integrated Socket.IO for real-time order notifications and Leaflet/OpenStreetMap for live GPS delivery tracking across all three roles
- Structured JSON-based data models for order management, menu handling, and user profiles; wrote modular, reusable component code
- Deployed frontend on Vercel and backend on Render with MongoDB Atlas, managing collaboration and version control via Git/GitHub

AI-Powered Interview Preparation Platform | *React.js, Node.js, Express.js, MongoDB, Groq API, JavaScript*

- Building a full-stack application that generates role-, skill-, and difficulty-specific mock interview questions
- Integrating the Groq API to evaluate user responses and generate scores, detailed feedback, and personalized improvement suggestions
- Implementing JWT authentication, interview history tracking, and REST APIs for interview and user management
- Building responsive React.js dashboards to visualize interview performance, feedback analytics, and progress over time

AI-Powered Resume Analyzer | *React.js, Node.js, Express.js, MongoDB, Groq API, JavaScript*

- Built a full-stack PHP (MVC) application where users upload resumes (PDF) and receive AI-driven feedback via the Groq API
- Implemented file handling and REST-style endpoints for resume parsing and third-party AI integration
- Designed MySQL-backed data flow to store and display structured match scores, missing keywords, and analytics history
- Built a premium UI inspired by Linear, Vercel, and Stripe, with a fixed sidebar layout and a custom CSS token system
